William Lee Cowden, MD: “MultiSymptom, MultiMicrobe Inflammation and the Cowden Support Program” (via Skype)

Chairman of the Scientific Advisory Board and Professor of the Academy of Comprehensive Integrative Medicine of Panama since 2008, is a USA board-certified cardiologist and internist who is internationally known for his knowledge and skill in practicing and teaching integrative medicine. He has co-authored, or contributed to, many books and other publications.

Barbara De Rijdt, RPharm: “Treatment of Lyme: Integrative approach”

Barbara received her education in Pharmaceutical Sciences at the University of Antwerp. Since her graduation in 2014 she’s working as a compounding pharmacist in Belgium. Her special interests include Lyme disease and other chronic multi-infectious disease.

Marjo Valonen, MD: “Herbal products in treating Lyme and Co-Infections”

Completed her medical training at the University of Turku, Finland. She has over 15 years of experience of treating chronically ill patients. She has studied functional medicine and Traditional Chinese Medicine along with herbal remedies and combines those teachings in her integrative patient care. Currently she is exclusively treating people with vector borne illnesses and MSIDS – most of her patients are prior treatment failures. She runs her own private clinic in Helsinki, Finland.

Magdalena Cubala-Kucharska, MD: “Autism and Lyme Disease”

President of Foundation For Development of Integrative Medicine. She developed her interest in autism in 2004, which led her to perform research on co-morbidities in autistic patients, with Lyme disease being one of the most important. Her very busy practice is focused on managing patients with ASD, tick-borne diseases, autoimmune and environmental diseases. She is currently conducting her research in the field of autism and tick-borne infections in affiliation with Medical University of Lodz. She is publishing her findings in peer-reviewed journals.
